RE: WOPR

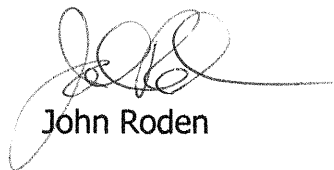

It is our understanding that the BLM, under the "Western Oregon Plan Revision," intends to substantially increase timber cutting and clear cutting allowed to the timber companies in BLM forests. We believe this to be a bad, non-profitable, counterproductive approach to our heritage. What is the gain to the people as compared to the timber companies from this revision?

Please consider our lands as part of one large organism - along with animals, fish, humans, trees - and understand cutting away vital living parts should not be the answer.

We will elaborate more if need be. We wished to just make contact and express our opinion.

We have lived in rural Douglas County for over 25 years.

Thank you,

John Roden
